

New Crosswalk Software Users

Download Crosswalk Software

New users of the Crosswalk software are required to go through the full software installation process. New users are required to download the software installation file, download your state specific database and install the software.

I. Download Software Installation File

1. Create a directory in **c:\Program Files** called: **xwalk98_FY05**. This will be your target directory.
2. To download the software installation file, *xwalkinstall.exe*, into the target directory:
 - a. Select the software **installation file** link.
 - b. A "File Download" box will appear with "Save this program to disk" selected by default. Select the **OK** button. (Windows XP presents the option to open or save the file. Select the save button.)
 - c. A "Save As" box will appear. Make sure the file you are downloading will be saved in the **c:\Program Files\xwalk98_FY05** directory and then select the Save button.

II. Download and Extract Your State Data File

1. To download your state data file into the target directory:
 - a. From the State Data Files drop down list, select your state. (only updated crosswalk states appear in the dropdown menu)
 - b. A "File Download" box will appear with "Save this program to disk" selected by default. Select the OK button. (Windows XP presents the option to open or save the file. Select the save button.)
 - c. A "Save As" box will appear. Make sure the file you are downloading will be saved in the **c:\Program Files\xwalk98_FY05** directory and then select the Save button.

Note: The state data file you downloaded is a self-extracting archive and is named *st05zip.exe* where *st* = *your 2 character state abbreviation*.

2. To automatically extract the state data file:
 - a. From Windows Explorer select the **C:\Program Files\xwalk98_FY05** directory.
 - b. Double click on the application file you previously downloaded, "*st05zip.exe*".
 - c. Your state data file, "*st_xwalk98.mdb*", will automatically self-extract.

Install the Crosswalk Software

Important - If your computer is running Windows NT, Windows 2000, or Windows XP the installer MUST have administrative rights. If you do not have administrative rights, have the Crosswalk software installed by your technical support staff. You should also close all other applications before attempting to install the software.

1. From Windows Explorer select the **c:\Program Files\Xwalk98_FY05** directory.
2. Double click on the application file, "xwalkinstall.exe".
A windows box will appear with the following message:

You are about to decompress and install the Crosswalk software. Please refer to the "Installation Instructions" for more information.

3. Select the **Setup** button. The Setup application will state, *Copying Files, please stand by*.
You may or may not get a system message stating:
[If you do not get this message, skip to # 11.]

Setup cannot continue because some system files are out of date on your system. Click ok if you would like setup to update these files for you now. You will need to restart Windows before you can run setup again. Click cancel to exit setup without updating system files.

4. Select the **OK** button.
5. Setup may or may not ask you the following question:
Do you want to restart Windows now? If you choose No you will not be able to run setup again until after the system is rebooted at a later time.
6. Choose **Yes**.
7. Your system will automatically reboot at this time.
8. After the system has successfully rebooted, return to the **c:\Program Files\Xwalk98_FY05** directory.
9. As you did in # 2 above, double click on the software installation file, xwalkinstall.exe.
A Windows box will appear with the following message:
You are about to decompress and install the Crosswalk software. Please refer to the "Installation Instructions" for more information.
10. Select the **Setup** button. The Setup application will again start copying files, this time successfully.
11. The following message will appear: *Setup cannot continue unless all your applications are closed.*
12. Choose **OK** to continue Setup.
13. By default, the Crosswalk Software Setup will install the software in **c:\Program Files\Xwalk98_FY05**. Click on the Computer button to install the Crosswalk software.
14. Crosswalk - choose program group screen will appear. Click the **Continue** button.
15. An "Installing Data Access Components" box will appear and it will automatically install Microsoft Data Access Components 2.1.
16. You may (or may not) get one or more "Version Conflict" boxes stating:
*A file being copied is older than the file currently on your system.
It is recommended that you keep your existing file...etc.,etc.
Do you want to keep this file?*

ALWAYS respond "YES" to this question.

17. **Eventually** you will get a message stating that *Crosswalk software setup is complete*.

Delete the Two Downloaded Files

1. Once the installation is complete, the two self-extracting archives, xwalkinstall.exe and st05zip.exe, are no longer needed. They can be deleted to save space.

This completes the download and installation process for all Crosswalk users. Double click on Xwalk98.exe to begin.

Current Crosswalk Software Users

Current users of the Crosswalk software do not have to do a full installation unless you are using a computer that has not been through the installation process. Current users need only to download and replace the program executable file, the updated program database and your state specific database.

Download the Two Program Files

1. Create a directory in **c:\Program Files** called: "**xwalk98_FY05**". This will be your target directory.
2. To download the program **executable file**, *Xwalk98.exe*, into the target directory:
 - a. Select the **program executable** file link.
 - b. A "File Download" box will appear with "Save this program to disk" selected by default. Select the **OK** button.
 - c. A "Save As" box will appear. Make sure the file you are downloading will be saved in the **c:\Program Files\xwalk98_FY05** directory and then select the **Save** button.
3. To download the updated **program database** file, *Xwalk98.mdb*, into the target directory:
 - a. Select the **updated program database** file link.
 - b. A "File Download" box will appear with "Save this program to disk" selected by default. Select the **OK** button.
 - c. A "Save As" box will appear. Make sure the file you are downloading will be saved in the **c:\Program Files\xwalk98_FY05** directory and then select the **Save** button.

Download and Extract Your State Data File (All Crosswalk Users)

1. To download your state data file into the target directory:
 - a. From the State Data Files drop down list, select your state. (only updated crosswalk states appear in the dropdown menu)
 - b. A File Download box will appear with "Save this program to disk" selected by default. Select the OK button. (Windows XP presents the option to open or save the file. Select the save button.)
 - c. A Save As box will appear. Make sure the file you are downloading will be saved in the **c:\Program Files\xwalk98_FY05** directory and then select the Save button.

Note:

The state data file you downloaded is a self-extracting archive and is named *st05zip.exe* where *st* = **your 2 character state abbreviation**.

2. To automatically extract the state data file:
 - a. From Windows Explorer select the **c:\Program Files\xwalk98_FY05** directory.
 - b. Double click on the application file you previously downloaded, *st05zip.exe*.
 - c. Your state data file, *st_xwalk98.mdb*, will automatically self-extract.

This completes the download and setup process for current Crosswalk users. Double click on *Xwalk98.exe* to begin.
